- Known for quality, craftsmanship, and timeless elegance
- Preaches functionality and aesthetic

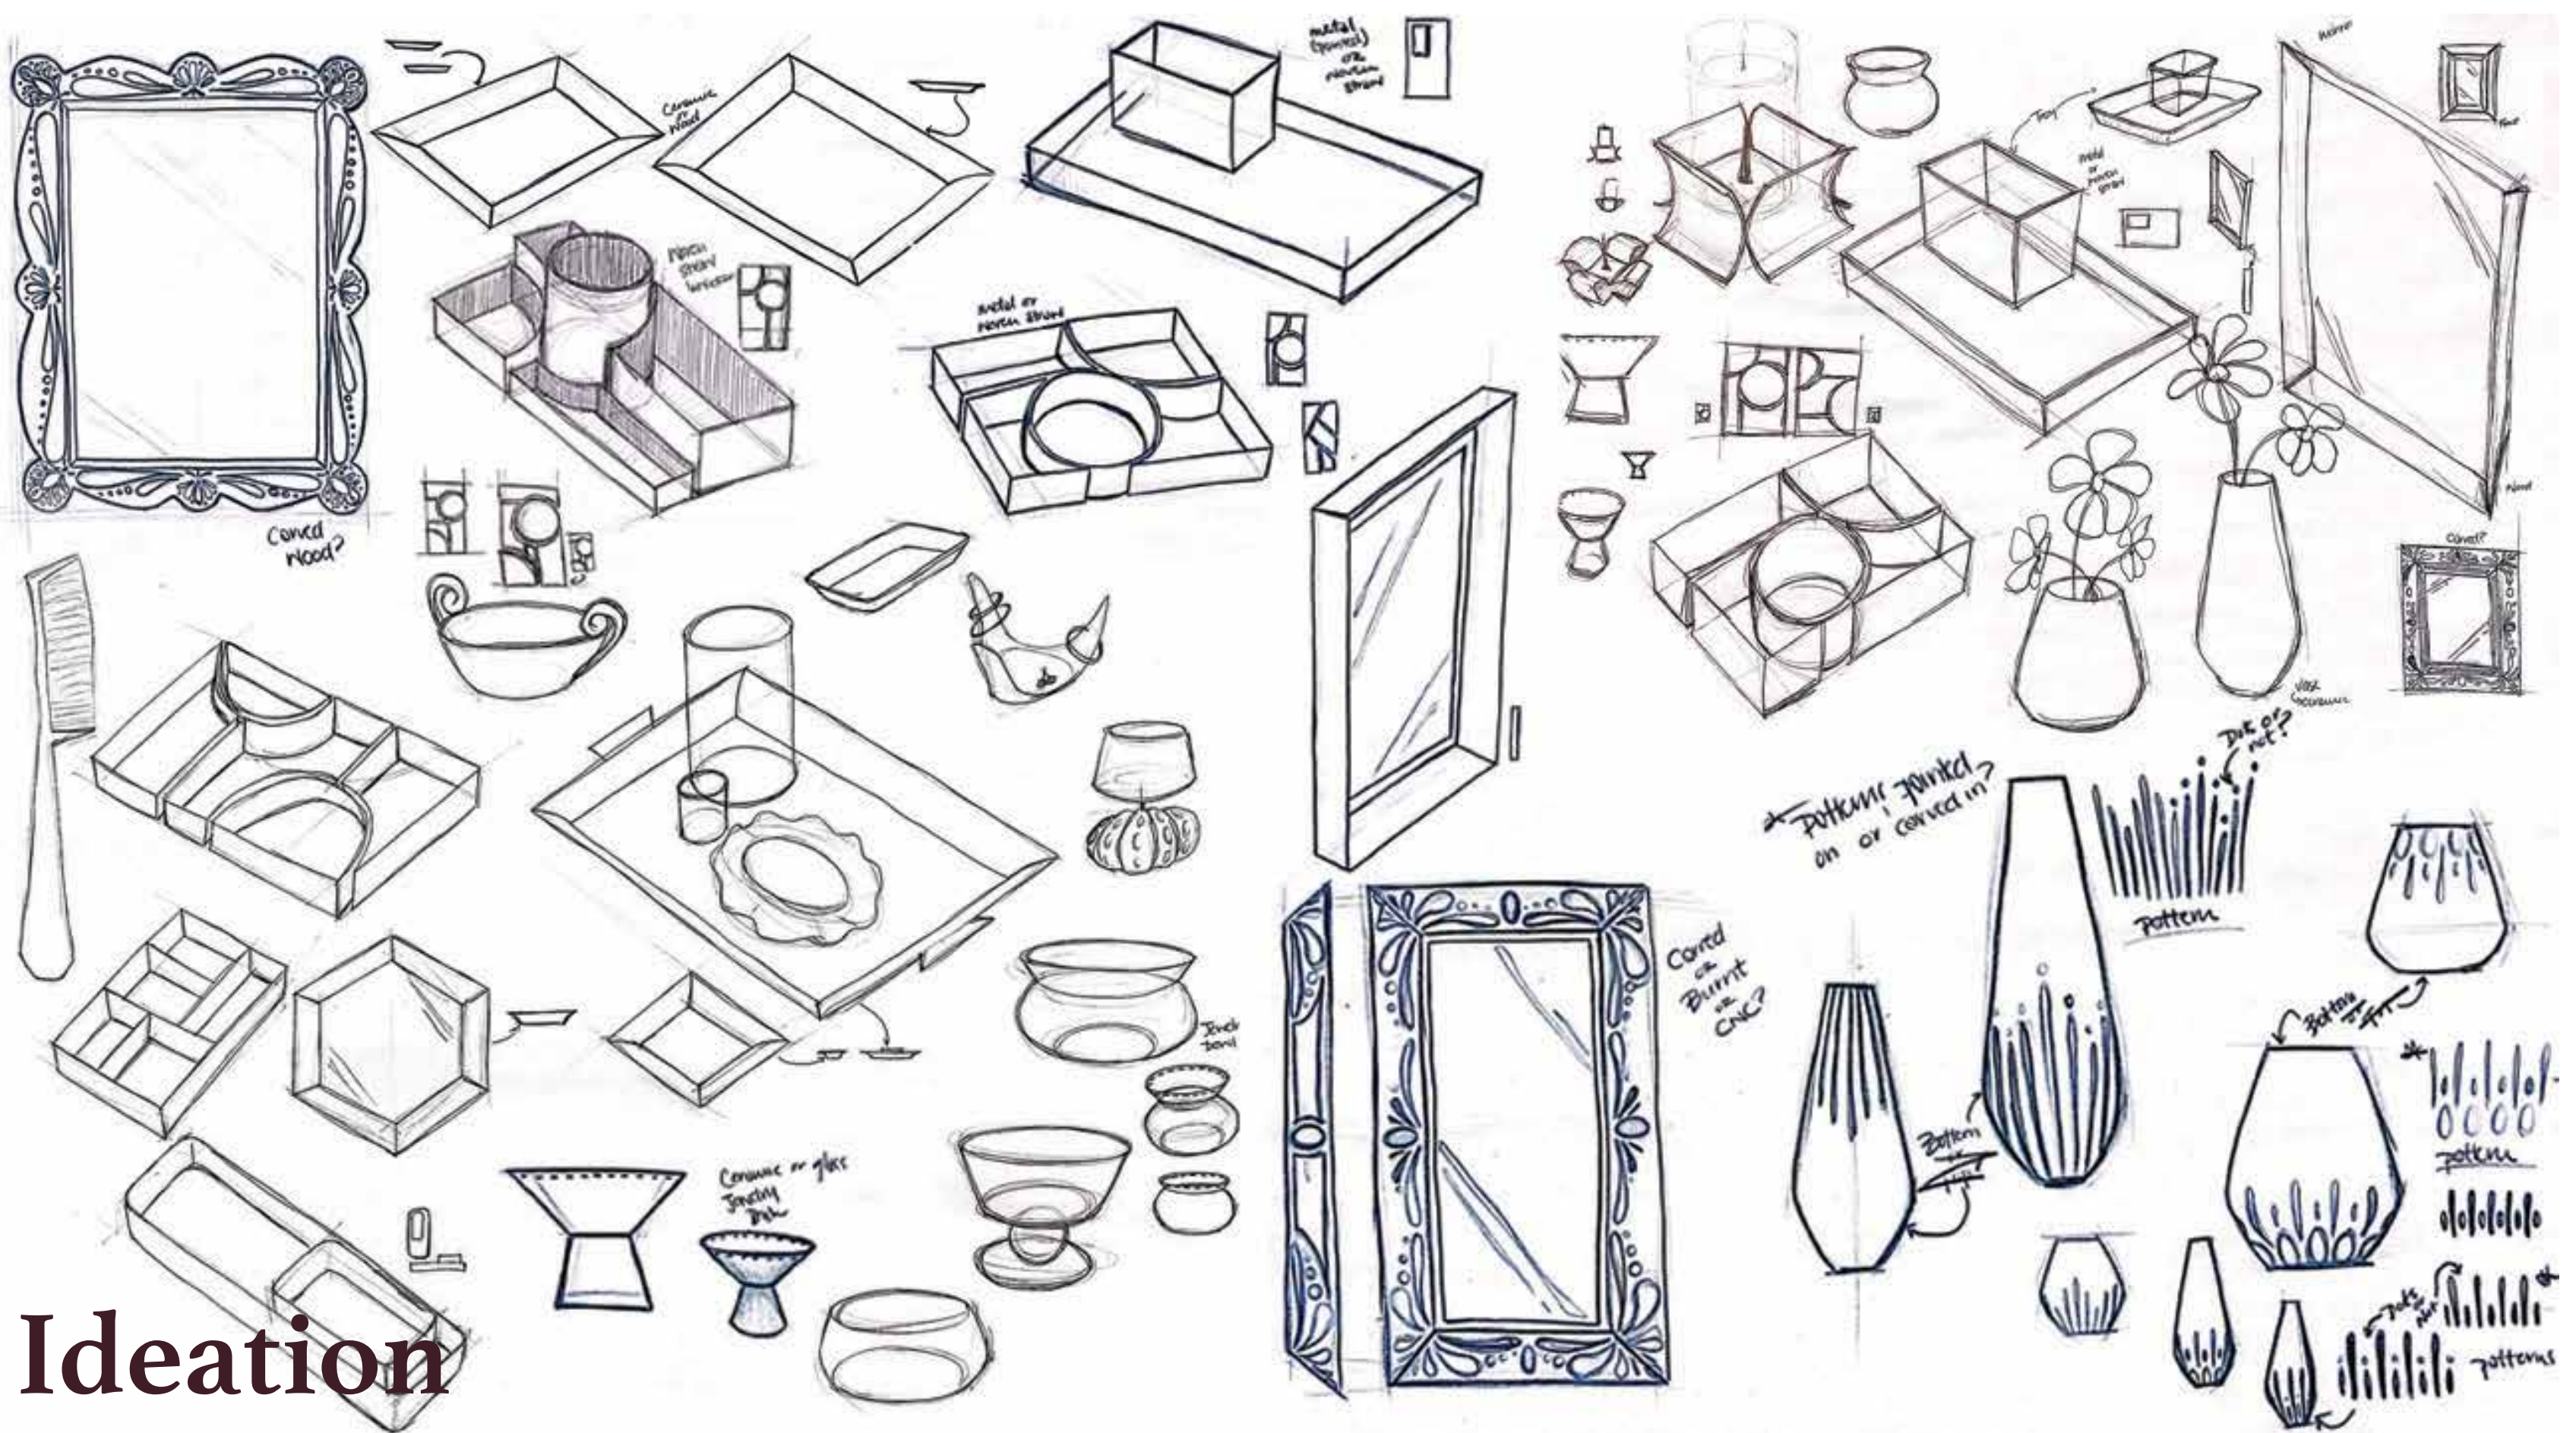

This vanity set aims to encourage a more organized, fulfilling, and calming rutual around sleep. These pieces are intended to create a warm and comforable space to help one unwind and to maximize the effects of rest by supplying a designated space to get ready for the day and for bed. The pieces also aim to encourage the idea of investment in good design as well as the belief that one should use what they adore, rather than saving it for the ‘best’ or ‘perfect’ moment.
